

2010 MOSQUITO CONTROL PROGRAM PEFFERLAW – PORT BOLSTER

Letters were recently sent to all property owners in the Pefferlaw and Port Bolster area requesting their support of the 2010 Mosquito Control Program. Written support of the individual land owner is required to obtain the necessary permit from the Ontario Ministry of the Environment for the application of the Biological Larvicide Bti. A map of the treatment area together with additional information is on display at the Pefferlaw Library and on the Town of Georgina website www.georgina.ca. If your property is located within the treatment area and you did not receive a letter please contact the undersigned to obtain the letter and form.

Please return the signed form to the undersigned by mail, fax or e-mail confirming your support or objection to the 2010 Mosquito Control Program by Friday, February 19th, 2010.

The operation and effectiveness of the Mosquito Control Program requires the support of the substantial majority of property owners in the treatment area.

Thank you for your cooperation.
