

WORKING CAT PROGRAM

We understand that not all cats may be suitable for a home and human interaction, though they still deserve to live in a nurturing environment. These cats provide a natural solution to pest control; its a win win!

We are committed to finding these cats the best placement whether that be in a:

- Barn
- Garden centre
- Workshop
- Warehouse
- Brewery/winery

Your perfect pest control solution!

INTEGRATING YOUR CAT

- Keep your cat contained in a small, quiet, stress free area for six weeks to help them adjust to the new environment
- Do not let your cat interact with other barn animals during the six-week adjustment period

MEDICAL CARE

Like pets, working cats will need regular check ups and vaccinations. With these cats spending the majority of their time outdoors, regular deworming and flea/tick treatments are essential.

Working cats from the Georgina Animal Shelter will come ready to work!

They are spayed or neutered, microchipped, given anti-parasitic prevention/treatment, and vaccinated for Rabies and FVRCP.

CARING FOR CATS IN SEVERE WEATHER

COLD

- Provide extra food and fresh water that is protected from the elements
- Provide extra shelter and insulation bedding such as straw
- Provide shelter options such as a barn stall, loft or storage room

WARM

- Provide extra water that is changed regularly
- Provide a well-ventilated rest area
- Provide access to lots of shaded areas
